RECKLI Textured Formliners

Produce concrete construction elements with textured exposed surfaces. Produce surfaces with highly elastic, reusable textured formliners made from polyurethane elastomers.

Pattern type:
RECKLI textured formliner type xx/xx

Pattern direction:
(horizontal/vertical)

Connections, edges and corners:
Sharp edges / in accordance with detailed plan / in consultation with client /
Any formliner impacts at delivery are to be carried out in consultation with the client.

Execution:
Properly secure the RECKLI formliner to the concrete mold, apply separator then pour the concrete.

Only formliner glue and separator that complies with the manufacturer's specifications should be used. Separator spray shadows should be avoided.
Work should be carried out in compliance with the "RECKLI textured formliner manual".

Exposed concrete should be protected from damage and weather using fiberboard and PE films after production.
