

RECKLI Surface Retarder CR Type N (negative process)

Texture a concrete element using a solvent-based concrete surface retarder.

Surface retarder:

RECKLI CR Type N (wash depth approx. x.x mm, see "RECKLI Surface Retarder Brochure")

Aggregate factor:

x-x mm (depending on the choice of surface retarder and wash depth, see "RECKLI Surface Retarder Brochure")

Execution:

Apply RECKLI surface retarder in accordance with the manufacturer's specifications. Pour the concrete and then rinse off.

Work should be carried out in compliance with the "RECKLI Surface Retarder Brochure".

Recommendation:

Once the concrete has dried, protected from the weather, it should be treated with a hydrophobic and oleophobic coating.

Brand: RECKLI surface protection

Exposed concrete should be protected from damage and weather using fiberboard and PE film after production.
