

FLAMES OF PARADISE

Set fire to the rain: Fiery flames or raindrops?
Flames of Paradise sparks your imagination.

RECKLI artico® neo is a plastic foil on which graphics or photos are printed with a high-quality concrete activator. The concrete activator causes the concrete to set at a different time so that it can be washed out on the surface after demolding. The uppermost cement skin is partially removed. The contrast between the washed out and smooth surfaces makes the graphics or photos visible. The foils are intended for single use.
