

### **RECKLI photo concrete artico ® neo**

Give an exposed-quality prefab concrete element texture with a film printed with concrete deactivator. (photo concrete).

Film thickness: 0.2mm

Photo concrete type:  
RECKLI artico® neo type xxx

Direction:  
(horizontal / vertical / according to the detailed plan)

Execution:  
Correctly place and secure the RECKLI photo concrete film in the casing, then rinse off after the concrete has been poured and hardened.  
The task should be carried out in accordance with the "RECKLI artico neo technical fact sheet".

*Recommendation:*  
*Once the concrete has dried out protected from the weather, it should be coated with a hydrophobic and oleophobic treatment.*  
*Brand: Reckli*

Exposed concrete should be protected from damage and weather using fiberboard and PE films after production.
