

RECKLI-Textured Formliners

Produce concrete construction elements with textured exposed surfaces. Produce surfaces with highly elastic, reusable textured formliners made from polyurethane elastomers.

Pattern type:

RECKLI textured formliner type xx/xx

Pattern direction:

(horizontal / vertical)

Connections, edges and corners:

Sharp edges / in accordance with detailed plan / in consultation with client /
Any formliner details can be discussed with RECKLI.

Execution:

Properly secure the RECKLI formliner to the concrete mould, apply RECKLI Release Wax then pour the concrete.

Only formliner glue and release wax that complies with the manufacturer's specifications should be used. Work should be carried out in compliance with the "RECKLI textured formliner manual".

Exposed concrete should be protected from damage and weather using fiberboard and PE films after production.

ISCC+ certified sustainable RECKLI Formliners

Produce concrete construction elements with textured exposed surfaces. Produce surfaces with highly elastic, reusable textured formliners made from polyurethane elastomers, made from sustainably certified material by the International Sustainability and Carbon Certification (ISCC).
